Additional Information for Undergrads: 
Professional Residency Program (PRP)

Please see [http://soa.utexas.edu/resources/prp/apply](http://soa.utexas.edu/resources/prp/apply) for eligibility criteria for participation in Residency.

**When may a Bachelor of Architecture student be on Residency?**

There are two options:

**Option 1:** fourth year Spring + following Summer

**Option 2:** Summer after fourth year + Fall of fifth year

For students choosing to do Study Abroad during Fall of the fourth year, the only option for Residency is **Option 2: Summer after fourth year + Fall of fifth year.**

Residency as outlined above (Option 1 or Option 2) will not delay your graduation date. Any other scenario **will delay your graduation date.**

**What courses must a student register for while on Residency?**

- **ARC 660T-PRP**
- **ARC 361T-PRP**

The two listed courses are the **only courses for which you will receive credit** while you are on Residency. Please talk to your academic advisor if you need to be registered for 12 hours to maintain full-time status for scholarships or financial aid during the Residency semester.

Please remember that CRP 369K is only offered in spring semesters, and it is a requirement for the Bachelor of Architecture. Therefore, to be safe, take CRP 369K during the spring of your fourth year if you are not already on Residency.

Do **not** register for Tech Comm (ARC 560T/ARC 361T) on campus if you are planning to do Residency in a future semester. The academic credit for Residency students is the PRP section of Tech Comm (ARC 660T/ARC 361T). Students doing Residency may not take any part of Tech Comm on campus.

We also encourage you to **not** take ARC 362 Professional Practice before doing Residency. Your advisor can explain your options for taking ARC 362, depending on your situation.

For reasons stated above, **talk to your advisor about your Residency plans every time you meet, and do not miss registration advising.**

Note: Most undergrads will **not** register for ARC 379-PRP during Residency. It entails additional work that is not pertinent to the situations of most undergrads. It exists as a mirror to what grad students are taking, because how they get credit for Residency is substantially different.
